ScissorLoc™ II

FLOATING SYSTEMS

ScissorLoc II is a dimensionally stable system with excellent natural ventilation capabilities due to its intersecting solid wood subfloor component design. ScissorLoc II is designed to withstand heavy loads while still providing a resilient and controlled playing surface.

Aacer’s PowerVent™ Advanced airflow system is a popular accompaniment to this system. It maintains balanced humidity above and below the floor as well as detects moisture to initiate mechanical airflow drying.
ScissorLoc™ II provides an intersecting subfloor design for premium airflow and uniform play.
