Anchored PowerLoc

FIXED RESILIENT SYSTEMS

Anchored PowerLoc is a hybrid of our ever popular ScissorLoc and Anchored PowerSleeper systems. The combination of these systems delivers a dimensionally stable floor with excellent ventilation capabilities and uniform performance. The option of the PowerVent™ Airflow system adds a feature which will detect moisture and start drying the system with mechanical airflow. The floor’s uniform performance makes it a good selection for new and retrofit sports floor applications. The system is EN-DIN and PUR compliant.
