

Anchored PowerLoc LP

FIXED RESILIENT SYSTEM

Anchored PowerLoc LP provides added benefits to our original PowerLoc floor. Like the original system, our LP floor delivers dimensional stability as well as excellent ventilation and uniformity. The LP system includes the recycled rubber ECO resilient pads. The inclusion of special resilient pad slots on the underside of machined sleepers allow desired shock absorbing deflection under athletic impacts while limiting pressure on pads when pressed with heavy non-athletic loads.

Anchored PowerLoc LP

Selected for new and retrofit sports floor applications, Anchored PowerLoc LP offers excellent reaction to athletic activities and desired resilient pad protection and provides excellent subfloor ventilation.
