

PowerPlay™ Panel

FIXED RESILIENT SYSTEM

Prefabricated PowerPlay Panels provide lineal cushions contributing to uniform high shock absorption and ball rebound value and offer athletic response equivalent to full blanket floors with the added advantage of subfloor ventilation and resilient pad protection. Sectional steel channel anchorage contributes to added stability and uniformity while allowing for lateral movement.

PowerPlay™ Panel

PowerPlay Panel provides desired shock absorption, basketball rebound, protective pad housing, airflow, and stabilizing steel concrete anchorage.
