

ReClaim III

FLOATING RESILIENT SYSTEM

ReClaim III addresses concrete substrates that do not meet the standard flatness tolerance required when installing typical hardwood athletic floors. Such slab conditions mostly relate to removal and replacement of older floors which otherwise can require pouring expensive and time-consuming leveling material. Desired shock absorption and performance is provided by the inclusion of our ECO resilient pads.

ReClaim III

ReClaim III is a highly resilient system providing a method to adjust floor profile height where other major expense would otherwise be required.
